Amendments to the Specification:

Please replace the paragraph beginning at page 5, line 17, with the following rewritten paragraph.

Referring now to the drawings, and particularly to Figures 1 to 6, one embodiment, the preferred embodiment, is there shown generally at numeral 10. This device 10 includes a support member 12 formed of generally rigid material and coated with an elastomeric coating to provide enhanced surface contact with the hand of the user. The support member 12 has a generally saddle-shaped obverse or outwardly extending surface 16 and which is made releasably attachable to the handle G of a tennis racket shown generally at T by a resilient metallic attaching strip or tab 14. This attachment strip 14 is formed in side elevation view into a generally "V"-shaped configuration as best seen in Figure 4.
